

REMARKS

The previously pending claims 29 and 31 have been found allowable. Applicants are filing a RCE herewith to present a further Information Disclosure Statement presenting items from prosecution of applications directed to similar subject matter as the present application. A further list of compending applications, indicating the corresponding International Application numbers, is also being filed herewith.

Claim amendments

New claims 32 and 33 are directed to the embodiments disclosed, e.g. at page 11, lines 8-9 of the specification. (Salts are included by the disclosure at page 8, lines 13-14.)

Some "housekeeping" items

It has come to the attention of Applicants' Representative that the specification of the present application as published (US 20070190071) includes an error in the structures drawn at page 59 of the publication. Specifically, in paragraphs [0156] and [0158] the propyl link between the purine group and the 3-morpholin-4-ylpropylamino[methyl]phenyl)acetate group is erroneously drawn as a butyl chain. This error was introduced by the USPTO during printing of the publication. The Examiner is requested to attend to correction of these structures during printing of the present specification for issuance as a U.S. Patent. Please see the attached page from the '071 publication.

Also, in the amendment of the inventorship made December 1, 2010, the name of the inventor Hiroki Wada is erroneously presented as Hiroagi Wada. USPTO records are presently correct as to the spelling of Hiroki Wada, but Applicants note that PAIR presently does not reflect amendment of the inventorship and the Examiner is hereby advised of the spelling error in the request for amendment.

Consideration of the references cited in the IDS filed herewith and the favorable action of allowance of new claims 32 and 33 in addition to the previously allowed claims 29 and 31 are requested.

Should there be any outstanding matters that need to be resolved in the present application, the Examiner is respectfully requested to contact Mark J. Nuell, Ph.D., Reg. No. 36,623, at the telephone number of the undersigned below, to conduct an interview in an effort to expedite prosecution in connection with the present application.

Dated: March 10, 2011

Respectfully submitted,

By 
Mark J. Nuell, Ph.D.
